The realisation that supply chains are inevitable and everywhere in this world came to me pretty early. My father owns a small shop, and I have grown up watching products getting delivered and going to the customers. From an early age itself, I got interested in the procedures through which the products reaches the customer. And this is the reason why I am interested in studying Supply Chain Management. That's why, when most of my friends were opting for science at the High School level, I opted for commerce.

I am currently studying in (Name of the School) at (Name of the state and country). The commerce program at our school is excellent with its panel of veteran teachers. We have conducted seminars and workshops on Supply Chain Management before. I have done my final project on this topic as well.

I have maintained excellent grades throughout my High School years. And scored (95%) in grade 11, which put me in the top 10% of students in our school. Besides this, I have participated in extra-curricular activities. I am an active member of the Math club at our school, and we have won several competitions at the national level. I have always been inclined to math and have been a problem solver.

With my academic achievements, reference material and research, I am hugely enthusiastic and determined to pursue my course in supply chain management and logistics. I want to opt for a global degree to get a top-level education in this field so that I can work with the best of the best. I hope to learn from the top manufacturers and then bring back the knowledge to my home country someday.

I had been researching for a long while for the top universities to study Logistics and Supply Chain Management. And in this research, I came to know about your excellent university. (Name of the University) impressed me with its excellent Supply Chain Management program, with esteemed professors and high-tech facilities.
