

## IELTS General Writing Task 2 Essay Sample with answer

### **Question:**

*Some people think that a sense of competition in children should be encouraged. Others believe that children who are taught to co-operate rather than compete become more useful adults.*

*Discuss both views and give your own opinion.*

### **Sample Answer:**

Some people think that children should have a competitive mindset between them. Others think that children must help each other instead of compete with each other to become good human beings.

People who believe that children should have a competitive mindset think that those children will be able to perform better in difficult situations compared to others. Their brains learn to survive in a tough situation helping in the development of their mental capabilities. For example, there is a study from Howard University that shows that children who studied in a competitive environment gave better results in exams than the students who studied alone. So it is important for children to learn to survive in a group.

But, people who think children who help each other instead of rivalling each other become better people. If they are able to avoid competition they together can work for the good of everyone else. People will be happy for each and there will be no sorrow as there won't be any losers since there is no competition between each. Everyone will be happy for each other's achievements. A study in Norway has shown that the helping mentality among the people has brought better results to the country as a whole.

To conclude, I feel that the second approach is good for everyone because such a mindset is good for humanity and the betterment of the society as a whole. The idea of helping each other is beneficial for a person individually and thus for the nation too.
