You should say

- What you have bought?
- Why you have bought it?
- Explain why you felt happy about it.

Describe a thing you bought and you are happy about model answer 1

Introduction

Well, I was a technology enthusiast from a very early age, I was captivated by computers and programming since my schooling days. So, for programming one needs to have a pc or a laptop to work on.

What you have bought?

It was last year, when I bought a laptop and I am proud that I made the decision to buy it. I consider that laptop has helped me in many aspects of my life as career, personal development and gaming too.

Why you have bought it?

The primary reason why I bought the laptop is for focusing on my career prospects as I want to become a software developer. Also, at that time, I was getting a good deal out of it as the laptop was available on a 30% discount.

Explain why you felt happy about it.

I felt extremely happy and lucky, because of that laptop, I started learning new programming languages which are going to decide my future and also the laptop came in handy during the lockdown phase, as everything was going online and working from home. Thus, my decision to buy the laptop was on point.

Conclusion

Hence, that laptop is a one time investment for me, which can be used for multiple purposes. My whole family uses it for their personal and professional work. So, it was a good choice and made me happy.

Describe a thing you bought and you are happy about model answer 2

Introduction

In modern times, cell phones are slowly and steadily becoming a must needed equipment after house, food and clothes. But also, I can't deny the fact that mobile phones are extremely helpful too.

What you have brought?

When I passed out of my high school, I gifted myself an Iphone, which became an important part of my life from that day. I bought it from my pocket money and all the saved money I had from a long time.

Why you have bought it?

At some age, mobile phones are necessary because no matter if you are in school or college or going to work, mobile phones are used everywhere. So, I was in my college and calling, messaging, assignment submission etc were an integral part of college that's why mobile was very much useful to me in my college.

Explain why you felt happy about it.

I feel delighted to have a personal mobile phone, because when I need to talk to someone, or when I am going through a down phase, I can easily connect with my friends and family for talking to them which indeed makes my heart light and calms me down. Buying a phone was one of the best decisions I have made so far.

Conclusion

Therefore, I can say that mobile phones have influenced my life in so many ways both positive and negative but at the same time it is necessary to have one.

Introduction

From my very childhood, I was really interested in reading books, at that age I used to read a lot of story books and novels. But growing up, I was amazed to read the content of self help books. Those books really turned me into a better individual.

What you have brought?

When I started reading self help content, I was deeply captivated by it. So, once I went to a nearby library and searched for good books. Then luckily I found this amazing book named "The Power Of Your Subconscious Mind".

Why you have bought it?

When I saw the cover and title for that book, It caught my eye at that very moment. Then, I decided to open it and read. I read one chapter and I made up my mind to buy it because it explains the concepts of how to control your mind unconsciously.

Explain why you felt happy about it.

I loved that book and now it is my favourite book too, because it helped me develop a positive mindset towards life and my career goals, it taught me to never give up in life. So all the learnings from that book has helped me grow as a person and now I feel much more confident about being myself.

Conclusion

Books have always been my best friends and always will be.
