

Describe an item on which you spent more than expected

What is it?

How much did you spend on it?

Why you bought it?

And explain why you think you spent more than expected

Describe an item on which you spent more than expected model answer 1

Introduction

When I made the decision a few years ago that I wanted to pursue a career as a resin artist, I had no idea what supplies were required to get started in the industry at the time. I had no notion of what resources were essential to get started in the area.

What is it?

I made a rash decision to buy an expensive hardener and epoxy because I was under the notion that using items of better quality would result in an improvement in the things that I produce.

How much did you spend on it?

To be very honest, there are many low cost epoxy there. But I was blinded by the videos on youtube and the recommendation that I got on the internet. Both of these sources pushed me to buy an expensive one. As I was not in wholesale, the sellers did not give me any discounts and the overall expense was Rs. 6000.

Why you bought it?

I was very much keen to learn the resin art. As I always look into many videos and free courses to do it on my own, I bought that epoxy to create a product that I saw in one of the videos.

And explain why you think you spent more than expected

It was all my fault, but I was in such a hurry to learn new things about this topic which caused me to purchase all of the raw ingredients at a price that was significantly greater.

Conclusion

I cannot change the past but now I have promised myself that I will not take any step in the future without proper research.

Describe an item on which you spent more than expected model answer 2

Introduction

I am the type of person who is not inclined to spend a lot of money on one thing in particular. When I have some free time, I truly enjoy producing some Do it yourself projects.

What is it?

In the past, I have created lovely works of handcraft specifically for Diwali. Typically, it takes me a few weeks to finish a project. The cost of the raw materials that I needed to construct an artificial waterfall in my backyard was quite high. The complete cost of purchasing items such as the up-hill motor, cement, decorative materials, and other items were high.

How much did you spend on it?

The overall cost of my do-it-yourself project was meant to be 2,000 rupees, which was the amount that the up-hill motor cost. Cement cost an additional thousand rupees, and the cost of the decorative material was twice as much as that of the motor.

Why you bought it?

I wanted to do something particularly memorable for that year's Diwali celebration, given that it was that holiday. I wanted to ensure its durability because it was going to be the centerpiece of my home's decor and this was a significant undertaking. It is a common belief in Indian culture that a welcoming front door will entice the goddess Laxmi.

And explain why you think you spent more than expected

I wanted to give that artificial waterfall to my mother as a gift because she has wanted one of these waterfalls for a very long time to be put in our home. In addition, having a waterfall in front is considered highly auspicious.

Conclusion

If I compare it with the artificial waterfalls available on the market I still saved a little bit. If I put my thoughts in such a way my expenses are justifiable, although deep down I know that I have spent a lot just on this decor.

Describe an item on which you spent more than expected model answer 3

Introduction

There is no denial that anytime we attempt to make a purchase, we make every effort to find the best offer. But occasionally, we end up paying more than we bargained for. Well, I must admit that I am very cautious in spending money and do not believe in wasting money on needless items.

What is it?

Last year I bought a laptop to attend the classes online. Also, for the purpose of researching and taking skill-based online courses I decided to buy a laptop.

How much did you spend on it?

My expectation was that it would cost Rs. 50,000, but I ended up paying Rs.1,00,000.

Why you bought it?

My city was under lockdown last year because of the Corona pandemic. During that time, all educational institutions were shuttered. My school decided to begin online classes. It was tough for me to study through my smartphone during class.

And explain why you think you spent more than expected

I had to spend more than anticipated, due to the recent shutdown prices rose unexpectedly. Prior to the shutdown, consumers tend not to purchase laptops and rather smartphones for internet tasks and purchases. However, after the shutdown, the situation changed drastically, and there was a paradigm shift in how individuals used laptops. Previously, only college students used computers for academic purposes, but after the lockdown, school-aged youngsters also began to do so.

Conclusion

Therefore, due to this, I was forced to pay the higher cost. However, I learned a valuable lesson from it that I will keep in mind moving forward.

Describe an item on which you spent more than expected Model answer 4

Introduction

It was an arangetram just a few months ago and I had to buy a saree for this function. As this is an important event for me, this event is supposed to be a highlight of my lifetime.

What is it?

The saree, which is to be bought for that day, always has elaborate detailing. There are many things that a dancer is supposed to be wearing which also include many pieces of jewelry.

How much did you spend on it?

I had spent nearly fifty thousand rupees, I actually might have gone above this amount as well because there were a lot of things which one needs to wear while dressing for the Bharatnatyam dance.

Why you bought it?

As this function is supposed to be a once in a lifetime experience, I did not think about the amount I am spending on the things I bought.

And explain why you think you spent more than expected

This would mark my first step in the world of dance, as the audience includes expert teachers and known artists as well.

Conclusion

Given the special circumstances, I would like to justify my stance and say that the amount I had spent on my clothes was correct. I had already burnt the midnight oil to prepare for this performance, I did not want a single reason to ruin this special day.
