

Describe a crowded place you have visited - Model Answer 1

Introduction:

Overcrowding or crowding is the condition where more people gather together within the given space. Crowding may occur temporarily or regularly. Most crowded places like shrines, tourist spots and now even bus terminals look to be crowded.

Where is it?

The crowded place I visited was the seashore. It's the area right next to the sea, where land meets the ocean, it is fi rocky or soft sands. Even though it is a wide place it seems crowded. People use it to relax themselves in the evenings and weekends. Some people spend their time at the seashore with their family members, some of them are with their friends and neighbours.

When did you go there?

Usually I went to the seashore on the weekend and in the evening to relax myself with a pleasant view of the sea. Some of them come with their family members to enjoy their weekends and evenings. Some days it looks crowded and some days it looks not crowded. The sound of ocean waves puts my mind at ease and I enjoy the view.

With whom you went there.

Sometimes I visit the beach with my family, but most of the time I spend with my college friends. We are a gang of 6 members. We gathered there to spend time and have fun. We separated after college for our careers. We felt that we were missing the old days when we had lots of fun during our college days. We thought of recreating them so we gather there at weekends when we are free.

And explain how you felt about being there.

Though it looks crowded it feels good to be there with my friends. We had lots of fun, we spent nearly 3 hours there and we left after finishing our dinner in roadside food shops. Some of them were conscious of their safety measures while some did not even consider it.

Conclusion

It feels good to spend time at the seashore, it feels much better when we are with our friends. In that minimum time they vanish our whole stress, they make our day a memorable one.

Describe a crowded place you have visited - Model Answer 2

Introduction:

Market is the sum total of buyers and sellers in one area. Where all the household products and our basic needs were available. Market consists of both wholesale sellers and retailers. Markets look crowded on weekends, festival times and festival offers time. Daily waged sellers will also benefit from the markets.

Where is it?

Market is the place where all the people gather there to buy some products, I went to the market which is located near to home, even it is spacious market it looks crowded in weekends and festival time, most of the daily waged vendors and chat stalls are there in that market, most people come there to eat and to buy groceries.

When did you go there?

Usually I go there on the weekend to some reasons, I avoid going there often to buy groceries and some household things, recently a week before I went there to buy several household things for festival, it was so crowded when I went there, even though the things are more expensive, people prefer this market to buy their needs.

With whom you went there.

I often go there with my mother to buy our needs. We buy some handcraft things which we keep in our living room, like hanging flower pots, some hanging frames etc. They were so pretty at an affordable price. We buy it from street vendors who survive with daily wages, it is a small help by buying their product from them. My mother always prefers these kinds of decorative things to make my house look good.

And explain how you felt about being there.

It is such a crowded area, some of them following the safety measures but some of them not considering it. This is the major reason for spreading various diseases. It

is the place where most of the people gather during festival days to buy products at cheaper rates. There is no place to park my vehicles. People move here and there continuously, I can't even stand in one place for a few minutes. Also, they rush me to move.

Conclusion:

It is not comfortable to buy products in such a crowded area, we should avoid making it crowded in these times and should follow the precautions.

Describe a crowded place you have visited- model answer3

Introduction:

The crowded place also includes amusement parks. It is also called a theme park, with many rides and water games, it is the best place for friends to enjoy. Mechanised thrill rides attract people to come and visit the park, rides like roller coasters, flat rides etc are designed there for enjoyment. Even some small rides are there for children to enjoy themselves, even artificial falls, artificial wave filled oceans are there as water games.

Where is it?

I went to the theme park which is located near Poonamallee, named as queensland. It is one of the theme parks in chennai which has many rides. It cost around rupees 600 as entry fee, even though it is more costly, people go there to have fun for a day, most of the schools were taking their students to this theme park as a tour for them.

When did you go there?

I went there recently once I finished my college, to make a memorable day. It is a spacious park, even 500 people can occupy it at time. It seems uncrowded on weekdays but I went on the weekend so it looks as crowded. Some of them came with their family and some of them were with their friends.

With whom did you went there

I went there with my childhood friends. It is the best place to enjoy a lot with my friends. We enjoyed it a lot, after some years we met there and had fun over one

another. It takes around a full day to complete all the rides , but we missed the rides due to fear. That day has become one of our memorable days. A roller coaster is a game which causes much fear to all of us but we enjoyed it.

Explain how you felt about being there

It is so good to spend time with my friend at that place. We spent nearly 45minutes to complete 1 ride, because we went on the weekend so it was crowded. Even though it was crowded, they organised it neatly by sweeping and collecting the garbage in trash bins. They won't allow people to use toiletries to be used in artificial falls.

Conclusion:

It is also one of the crowded places, but it is more spacious so it seems uncrowded. Even if they maintain it neatly, we should avoid some activities like throwing garbage in the walking lane, or grass lane. We should put it in the trash bin.
