

Describe a goal you want to achieve in the future - Model answer 1

Introduction

I have a to-do list and I achieved majority of them. Honestly, certain goals were difficult as I did scuba diving in Manali, river rafting, bungee jumping, etc.

What it is?

I would like to go on for a marathon that takes place in my city and it always turns out to be great fun while running. The major reason for people to run marathons is to remain healthy and it is even said to be the best cardiac exercise day. As a result of this reason, the majority of people participate.

When you discovered?

I got to know about marathons when I was in the 10th grade and I heard the news about a legend who ran 26 miles in the Philippines where he defeated the invading Persians. From that point, I decided to join the marathon and to date, it has been fun and exercise too. My brother gave me this news and he always accompanies me on this run and defeats me every time. Therefore, I want to improve it.

How you want to improve it?

I would like to improve my running by building stamina, consuming more greens, and exercise, and doing yoga on a regular basis. This will eventually help me to boost my stamina and make me healthy.

And how do you feel about it?

It is not impossible but I would surely achieve it one day with a lot of practice and hard work.

Conclusion

To sum up, I would like to say that I will surely again participate in the marathon with my brother and beat him in the same.

Describe a goal you want to achieve in the future - Model answer 2

Introduction

Majority of individuals set goals and work hard to achieve them. One of my unfulfilled ambitions is to be able to communicate in French. It is crucial to learn a foreign language and knowing a second language has become a valuable asset in today's

society. Companies are looking for potential candidates who can offer more in terms of cultural diversity in addition to motivated individuals with experience.

What is it?

French has enticed me since my brother speaks with such ease and fluently. But, however, I didn't get the time or appropriate person to teach such a foreign language.

When you discovered?

I only had this idea a year ago because I realized that knowing more foreign languages is beneficial not only in our daily lives but also in our work environments. To accomplish this, I enrolled in a French class for beginners twice a week, and I also downloaded Duolingo, an app that helps people learn foreign languages, on my phone so that I could study on my own at home. Unfortunately, because I was working full-time and had many other social activities that distracted me from studying, I was unable to keep up with the schedule for a long time.

How you want to improve it?

There were times when I was so busy that I had to work extra hours to complete my project work. As a result, I was unable to attend class and certainly did not have time to study at home. Furthermore, my friends complained that I had been ignoring them, so I needed to make time to see them. To be honest, I want to improve it by getting trained in the hands of an expert.

And how you feel about it?

As a result, I gradually lost interest in learning French, and I can only recall one alphabet table, despite the fact that French uses a variety of alphabets. In the near future, I will return to class and study diligently so that I can speak fluently.

Conclusion

In the end, I would like to say that not everyone who sets a goal gets it achieved in one go. Here, I was not able to accomplish my goal but as mentioned earlier I would surely achieve it in near future.

Describe a goal you want to achieve in the future - Model answer 3

Introduction

Honestly, I've never been a particularly ambitious person. Moreover, I have never had any interest in any particulars but have always loved cooking.

What is it?

Therefore, I always wanted to open a small restaurant one day. I love good food and never pass up an opportunity to try something new every now and then. In fact, my food obsession has turned me into an exceptional cook since I enjoy experimenting with recipes and adding my own personal touch.

When you discovered?

Everyone who has eaten my food has always complimented and encouraged me. As a result, it was only natural for me to fantasise about turning my passion into a career. Since deciding to open my restaurant, I have worked hard to further train myself in various styles of cooking and to improve my cooking skills. I even travelled to Lucknow to learn about Mughlai cuisine, which is one of my all-time favourites.

How you want to improve it?

I want to improve it by making new dishes such as Mexican dishes as more and more youngsters are fond of it. Most importantly, nowadays people are shifting towards healthy diets and thus I want to make dishes with the majority of exotic vegetables for fitness freaks and health conscious individuals.

And how you feel about it?

I am elated as well as stressed as all my planning is done and have also searched for a good location that is centrally located and has plenty of parking. As this is my dream project, I want to make certain that everything goes as planned. This also necessitates a significant investment, for which my family has agreed to contribute a portion and the remainder will be financed through a bank loan. I am leaving no stone unturned to ensure that my restaurant opens soon and makes an impression, so I decided to hire some marketing professionals prior to its official opening to create a buzz in the city.

Conclusion

My goal would be to provide quality and tasty food at reasonable prices. I recognize that this is a lofty goal that will necessitate considerable effort, but I am determined to see my dream come true one day, for which I am willing to work tirelessly day and night.
