

To Whomsoever It May Concern

I am writing this letter of recommendation in support of (applicant's name), a student in an undergraduate program (specializing in Mechanical Engineering) in the Department of Mechanical Engineering at (College Name and Location).

I have known Ms (applicant's name) in my capacity as her Professor for more than two years. I taught her the Kinematics of Machines and Fluid Mechanics subjects during her fifth and sixth semesters, a 3 Credit score and she secured an A++ grade. In my observation, I would say that she is a dedicated and studious student. She maintains a good academic record and strives to give her best in all extracurricular activities. She's good with tools, meaning, she can fix problems using mechanical tools. As a go-getter, she knows how to proceed with a task and get the job done.

(Applicant's name) possesses excellent communication skills and a positive aura. She gets along well with peers and teachers. She is equipped with the right level of mindset, self-confidence and leadership abilities required to undertake any challenging tasks. Her thirst for knowledge keeps her up-to-date with the latest developments in the engineering field. Moreover, she actively participates in international conferences and seminars.

With all these positive attributes, I am confident that Ms (applicant's name) will be a worthy candidate for the master's program and thereby strongly recommend her for admission to your university.

Sincerely,

Richard Samson
