

Sample SOP for MS in Computer Science

My passion for computer science and the tech field started when I started looking at the technical aspect of the games I used to play in my holidays. I remember that I used to show more interest in talking about game development with my friends and cousins. I admire not only the emerging phase of the technology but the innovation and the ideas that are involved in it. This curiosity made me choose the computer science field in my schooling without any second thought.

When it comes to academics, I have been a consistently well-performing student. My school education is the point where I came to know the reality and the concepts that are hidden behind each process. Over the years, my passion for technology has diversified in many fields such as programming, application development, website development, etc. INSTITUTE NAME where I laid the foundation and found my interest.

I have successfully pursued my Bachelor's in Computer Science at INSTITUTE NAME with 80% of marks. The institute not only sharpens my knowledge in subjects such as algorithms, and operating systems but also my soft skills. I have been actively involved in extracurricular activities such as participating in cultural events and organizing events. I always had a discussion with myself and my seniors about whether I had to enter into the professional world or strengthen my core skills.

I finally decided to gain deeper knowledge by pursuing an MS in Computer Science outside the country. I not only want to further develop my knowledge, but I also want global exposure which helps in my professional growth. I wanted to pursue my

postgraduate studies in the USA as the country is known for its high-quality education and technological advancements.

As I decided on my destination for studies, I started researching the institutes where I came across the UNIVERSITY NAME. I found out that the university was ranked among the top global universities. Also, I came to know the research facilities and the career development guidance. These made me strongly decide to secure admission to the UNIVERSITY NAME.

With the knowledge and skills gained from the MS in Computer Science offered by UNIVERSITY NAME, I'm sure that I will be able to step up into the professional world more confidently. After gaining the core technical skills, I would like to grow my career in business development by creating strategies and inventions. Being a part of this university will be a great opportunity to grow as a professional. I'm eager to join MS in computer science at the UNIVERSITY NAME.
