

Sample SOP for Project Management

Study of management courses teaches us the art of making our employees work effectively and efficiently to maximise productivity of a firm. Pursuing a course like project management will be pertinent to my contemporary proven skills and also helps to learn how to prevent a project from sinking deep.

The platform of my future plan was laid back in the schooling by my teachers who taught me to think of innovative ways, boldness to take up any challenge, going on stubbornly until the goal is achieved and never to take aback under any circumstances. After my schooling and pre university education was done I enrolled for Bachelors of Business Administration(BBA) at <College Name>, <City>. My passion is reflected in my academic prowess where I consistently acquired good scores in all the semesters.

I experienced my professional exposure for the first time through an internship done at <Company name> during my final semester. This experience made me develop proficiency in team management, programming languages like HTML, CSS etc. I am skilled at database management, accounting softwares like Tally, Big data, MS office.

After my graduation to garner some professional experience I joined as a financial analyst <Company Name> where I was responsible for managing the company accounts and finances. I am fortunate to receive support from our senior officials during the assigned critical tasks that aided me to build discernment for my career growth. I have been working in this company for 5 long years dealing with the planning and control of company initiatives, funds, projects etc. It is always good to upgrade ourselves to the latest technologies to progress our business further. Having gained crucial experience, knowledge my aim is to upgrade my skills further by pursuing a project management course like this to raise my professional career further.

Upon a lot of research I chose to pursue this course in <College Name> in <Country name> due to its excellent academic faculty, provision of corporate opportunities, and guest lectures by eminent industry professionals. There are several factors that attracted me more towards this university like infrastructure, discussion boards and moderated debates conducted to express our innovative thoughts further.

The course curriculum of this college mainly addresses the increasing complexity of the latest business environment and focuses on business tactics that yield desired results globally. Since the degree is globally recognised, having a course completion certificate from Canada will enhance my career prospects in my home country significantly.

The scope of project management professionals is incredibly high in India so I prefer to return back once the course is completed. Pursuing this one year post graduate diploma in project management would equip me with the comprehensive insights needed to manage all the aspects of a project in adherence to organisation goals.
