

Sample SOP for Master's in Australia

Marine resources like oceans, rivers are the life support systems on the planet. From childhood I was fond of travelling in oceans and developed a keen interest in finding the hidden secrets inside it.

After my class12 our family planned a summer vacation to Sri Lanka through a cruise ship. That journey was pleasant and revived my thoughts regarding upcoming education. I appeared for the IMU-CET entrance exam and secured a seat in bachelor's in marine engineering.

This graduation study taught me primarily on the development and production of internal systems boats, ships, submarines. It focussed on the subject related to design, innovation, construction and maintenance of seagoing vessels and navigation equipment in a theoretical and practical ways. Along with the academics, my extra curricular achievements in the field of badminton, interior home design shaped my personality as an innovator and leader.

With this academic performance and skills I got placed as second engineer at XYZ shipping company. This exposed me to the industry further to learn more and implement theoretical knowledge practically. After working for 4 long years, I realised that upgrading of skills is necessary to drive a sustainable future.

Upon a lot of research on the internet and visiting the website I came to know that Australia is marked as best in academics, employment to potential employees etc. Apart from this it is the safest country providing a good quality of living to the international people.

The XYZ university in this country is best suited for this course due to its excellent course structure that perfectly matches my requirement. The industry visits, workshops and the internship opportunities provided by them to the students to learn hands-on experience has reflected their excellency in creating future engineers. The scope of placements to the students without any racism marked them as best worldwide.

Studying higher education at your university will uplift my credentials in the job market and pinpoint me as an important resource. I hope my declaration statement has mentioned to you all the relevant information required for the admission. Hoping your acceptance that aids me to step ahead professionally.
