

Sample SOP for Engineering Management

As a member of a small business family, I was always fond of running a business, looking after the management, and so on. From using strategies to increase the sales of products to managing the customers, I have seen it all. Other than management I always wanted to learn technical aspects too. Thus, Engineering management would be a perfect choice for me.

I completed my schooling in (The school's name) with (90%). During high school, I opted for Physics, Chemistry, Mathematics, and Computer Science. These made me strong in technical aspects. After schooling, I worked in my family's small business and increased the income by 50% and also developed soft skills such as communication, attention to detail, and teamwork. I was constantly involved in activities that involved people, interactions, and teamwork. It was thrilling every time I worked in a group. As a result, I realized that management is my genuine calling. I want to learn Engineering management as they help strategize, design, and manage projects at every stage, ensuring that the projects are completed efficiently, correctly, and on schedule.

(University name) would be a perfect fit as it has been ranked in the top 10 universities in (Country name). The professors are well-skilled in their particular field of subjects and their personalized attention to every student is what makes the university unique. My talks with existing XYZ students have further added to my conviction.

My ultimate goal is to become a successful entrepreneur and provide various job opportunities around the country. Doing a master's at the same university would be my short-term objective. Learning under skilled professors would be a fantastic opportunity.
