

SOP Sample for Project Management

Having interpersonal skills like teamwork, leadership will be useful to inspire others to make the impossible things possible. My capacity to encourage the team for the development is always my strength and pursuing studies further related to management will aid to realise my full potential as a leader to make my contribution in the success of the future organisation I work with.

I always had an interest in this management field from a quite young age. With a strong determination I planned my academic direction that will enable me to have a professional life to push the boundaries of my capabilities.

During my 12th standard I started preparing for national entrance examinations to enrol for undergraduate courses that help to lay a foundation in the topics I am interested in. As a result of my hardwork and determination I secured admission for Bachelors degree in Information Technology at IIT Mumbai. In my graduation, I made every possible effort to gain as much knowledge as I could and strived hard to understand the concepts of programming in a theoretical and practical manner. Along with the studies I was equally involved in extracurricular activities like football. Our football team lifted the trophy of the intercollege competition held in the year XXXX.

In my graduation a project was assigned to me as a part of the college curriculum. I formed a team with my friends and took on the leadership role to complete the project. It was then I realised my inbuilt qualities that aided me to run a team smoothly that has different kinds of people with various opinions. I cleverly solved the conflicts with a lot of ease and submitted the report within the stipulated deadline. In Fact this incident made my decision stronger about my career in the future.

After my undergraduate studies I started my professional career as an IT associate and was promoted as a team leader within a year through my skills and capabilities. My 5 year working experience helped me to build a strong level of knowledge on various aspects and pushed my boundaries of capability in the field I am interested to work in. After gaining professional experience I felt this is the right time to opt for higher education to improve further.

I was highly impressed after seeing the curriculum of the program offered by your university. The prominence you have given for the practical based knowledge to improve skill sets has attracted me more towards your college.

Along with this the other factors that made me choose the XYZ university as my first priority is the incredible support given by the faculty to the students to progress further, amenities that the campus is providing for the international students to stay hassle free etc.

I preferred to study in Canada due to its high rank as best in the world for higher education in almost every discipline including management. Meeting people around the world and getting to know about their background, culture develops new perspectives as well.

I look forward to learning various aspects of project management and gaining a strong level of knowledge to handle a project from scratch till the end. Having certification from this university will enable me to give a great competitive edge over other candidates.
