

## Statement of Purpose for Masters in Project Management

Management programs mainly focus on managing a group of projects in order to achieve a final outcome that benefits the company. The fact that the field of management presents good opportunities for professional growth is the primary reason I am enthusiastic about choosing this particular career path. In all aspects including professional and academic I tried my best to push the boundaries of possibilities.

In the process of my academic journey I earned a bachelor's degree in the field of Computer science engineering at India's most prestigious institute IIT Kanpur. I was an enthusiastic student and pushed myself to broaden my horizons to maximise my potential. My dedication and consistency is reflected in the academic performance by scoring excellent marks in all the subjects.

I was always inclined more towards the field of project management due to its enormous possibilities for a lucrative career path. After my graduation was done I worked as an intern under a project manager at XYZ IT management company. This internship taught me many important concepts we follow in the technological world and gave me the ability to work on my existing management skills to ensure a deliverable project within the scheduled time. This excellent opportunity helped me to project my organisational and team management skills which were appreciated and soon promoted as a project engineer at the same company.

I spent 2 years working as a project engineer holding the responsibilities related to risk assessment, project execution, product design and others related to work. After gaining appropriate hands-on experience I decided to enhance my skills further that can improve my proficiency in the industry I chose to work.

Upon a lot of research about the various universities I came across <College Name> located in <Country name> marked as best for its management programs because of the highly qualified faculty members and their project deliverables. Along with this the university possesses an excellent course curriculum with cutting edge libraries and alumni students spread all over the globe in top positions.

Canada has always been an interesting and major choice to me due to its incredible nature and warm welcoming of international students to the country. Pursuing this course will equip me with advanced knowledge in the field of project management thereby setting me up with a successful future.

I am confident that I would make a significant contribution to the university intellectually. Through this master's program, I would like to build myself with the knowledge, skills that help me to work with different personalities in the future to deliver a successful output. This degree creates a pathway to my passion to work as a professional project manager that makes me grow as a leader. If my candidature is considered in a positive light, my goals and ambitions will be materialised fully.
